WPA2, which requires testing and certification by the Wi-Fi Alliance, implements the mandatory elements of IEEE 802.11i. In particular, it includes mandatory support for CCMP, an AES-based encryption mode. Certification began in September, 2004; from March 13, 2006, WPA2 certification is mandatory for all new devices to bear the Wi-Fi trademark. Sat, 12 Jan 2019 15:32:00 GMT Wi-Fi Protected Access - Wikipedia - Background. On October 31, 2002, the Wi-Fi Alliance endorsed TKIP under the name Wi-Fi Protected Access (WPA). The IEEE endorsed the final version of TKIP, along with more robust solutions such as 802.1X and the AES based CCMP, when they published IEEE 802.11i-2004 on 23 July 2004. The Wi-Fi Alliance soon afterwards adopted the full specification under the marketing name WPA2. Fri, 11 Jan 2019 22:50:00 GMT Temporal Key Integrity Protocol - Wikipedia - WPA WPA2 (Wi-Fi Protected

Wi-Fi Protected Access (WPA et WPA2) est un m^âcanisme pour s^âcuriser les r^âseaux sans-fil de type Wi-Fi.
